Subject: [External] Dominion increase

I am writing to oppose any increases for Dominion or Blue Granite, SC residents already pay 23.36% greater than the national average. It is an unfair burden on the consumer to raise prices yet again. As consumers we are told to budget, to tighten our belts and yet the commission and our legislators never seem to say the same thing to corporations who claim they wasted money and now need more. The nuclear fiasco is not the fault of the public nor is it the fault of the consumers. We should not be burdened with their poor judgment. Blue Granite wants an almost 50% increase to residential customers again yet they got an increase in 2018 this increase should be denied and we the people should not have to shoulder the burden of poor money management by corporations. Both Dominion and Blue Granite represents a fatally flawed policy, imposing unnecessary, staggering costs on South Carolina residents.

Thanks
